Barefoot Connect compatibility for charging the lamp

Versatile design can be used in nine different positions

2.5W solar panel the largest available for a single-lamp product

3.3Ah LiFEPo4 Battery the largest and longest-lasting battery in its class

Barefoot Go Installation Instructions

1. Permanently install the solar panel on the roof in a position that receives full sunshine all day. The solar panel is waterproof
2. Plug the solar panel into the lamp to charge the battery.
3. Barefoot Go must be charged fully before it is used for the first time.
4. When charging, the battery status LEDs will flash.
5. When the battery is full, the LEDs will double flash every ten seconds.
6. Press the power button to turn the lamp on and toggle between ultra, bright and night light settings.
7. Barefoot Go includes a battery status ring. One segment indicates low battery; two segments, medium battery; and three segments, full battery.
8. Each time the power button is pressed, the battery status indicators will illuminate for five seconds.
9. When the battery is low, the lamp will automatically dim to a lower light setting and the low-battery LED will flash.
10. To assemble the stand, insert the three metal legs into the stand ring
11. Barefoot Go includes a 1Amp USB output for charging mobile phones and other devices.
12. If the USB is overloaded, a fuse will activate to protect the lamp and battery. Remove any device plugged into the USB - the fuse will automatically reset within 5 seconds.

Warranty All components guaranteed for 24 months from date of purchase by first user. The warranty is not valid if product is misused or damaged by the user. For warranty terms and conditions please contact Barefoot Power at info@barefootpower.com
