

## Barefoot Power 12V TV and DVD Player

The Barefoot Power 12V TV and DVD player plugs directly into the Barefoot Connect 12V output. It includes a multi-region DVD player and USB input for playing multimedia files.

By utilising the latest LED technology and efficient power supply, average power consumption is less than 13W. Basic product specifications include;

1. 16 inch LED display
2. Remote control
3. DVD player
4. USB input
5. AV input
6. HDMI inputs
7. Analogue/digital tuner
9. ON/OFF switch to disconnect power to device
10. 12V Barefoot Connect power cable
11. Average power consumption <13W

It is critical to switch the TV off at the power cable when not in use to conserve battery power. The TV will continue to use power if left on, or in standby mode.

The Barefoot Power TV is compatible with all Barefoot Connect systems. However, it is recommended for use only with larger system to preserve enough power for lighting and other activities.

Barefoot Power provides a 12 month warranty on this accessory.

### Runtime per full day of charging

	Connect 600/620	Connect 2000/2020	Connect 3000
No lamps on	1.3 hours	4.2 hours	6.4 hours
1/2 lamps on for 6 hours	0.6 hour	2.1 hours	3.2 hours
